

Green Park Plot 4 Reading

Green Park is masterplanned around a picturesque, naturally-landscaped lake that was created by diverting a nearby brook. EPR Architects' competition-winning design for the 'gateway' site both set the high standard of architecture for this prestigious business park, while providing a welcoming focal point for visitors.

Green Park Plot 11 Reading

Following the success of Green Park Plot 4, we were commissioned to produce a design for two further buildings for Cisco Systems, on a prominent plot at the south of GreenPark. The two buildings are of similar design with splayed office wings, a central atria and sweeping curved south-facing elevations that act as a thermal and acoustic buffer.
