

The Filaments (Buckhold Road), Wandsworth

Our design for the Aurora apartment buildings forms part of a larger scheme which transforms a dormant industrial site into a modern and sustainable mixed-use development. The scheme comprises 340 high-end apartments above flexible retail and commercial uses at ground-level, together with basement parking, new access and associated works. Carefully lit landscaped gardens, walkways and open spaces complete the design.

This is a detailed planning consent obtained by EPR for our client Minerva PLC, who subsequently sold the site to Mount Anvil. This scheme has been successfully completed as part of The Filaments development.
